

SIERRA STAIN® REACTIVE ACID STAIN

- Available in 9 standard colors
- A concentrated penetrating reactive stain that chemically combines with cured concrete to produce permanent, variegated coloring effects.
- Packaged in 1-gallon (3.8 L) bottles of concentrate, with recommended application diluted with one gallon of water.
- At diluted strength coverage is approximately 200-300 square feet per gallon, but varies with surface conditions. A second application is recommended.
- Wide color variations, mottling, and unevenness of the color is normal and to be expected.
